AIR SERVICE TRAINING

Air Service Training (AST) has delivered aeronautical training to the world's airlines, maintenance organizations and military formations for over 70 years. AST has held approvals for its training provision since their inception, and is currently approved under IR part 147 to offer training and examination to meet the requirements of all currently available IR Part 66 aircraft Maintenance Licence categories.

Where Transmile Air Services (TAS) staff are authorized by AST, the modular course delivery may be undertaken by TAS directly, with the technical training notes and examinations offered by AST.

EASA PROGRAMME DETAILS

Part-66 Modular Courses

REMOVAL OF RESTRICTION ON YOUR EASA PART-66 B1 and B2 LICENSE

Modular Courses

We offer to conduct modular courses which can be customized to the individual customer's needs. Content, level and duration will consider the entry qualification and experience of the trainees.

These modular courses could be an ideal add-on or refresher training to prepare for a full basic examination. Typically modular courses do not include practical elements.

Transmile Air Services affiliation with AST is approved to conduct Approved Examinations for all Modules given in EASA Part-66. All modules certificates are issued by AST and can be submitted to any EASA competent authority with relevant maintenance experience for your AML application.

ADVANTAGES

- Courses in consideration of the trainees theoretical experiences
- Reduction of costs to sitting exams in UK.

On Job Training (OJT)

On job training (OJT) is one of the major element and requirements as per EASA Part 66. We are able to provide the full 5 years OJT package as stipulated in order to enable the application of AML with UKCAA.

APPROVED EXAMINATION RATINGS

CLASS	RATING		LIMITATIONS
BASIC	A	TA.1 TA.2 TA.3 TA.4	Aeroplanes Turbine Aeroplanes Piston Helicopters Turbine Helicopters Piston
